

# Does your next soft-tissue solution start with a fiber of innovation?

## Exactly.

Answering your soft-tissue needs means putting our 165 years of collagen expertise to work – finding new ways to support your regenerative vision.

Introducing  
**Geistlich Fibro-Gide®**

- › Geistlich Fibro-Gide® is the first manufactured 3D volume-stable collagen matrix for soft-tissue regeneration – eliminating the need for a second surgical site and reducing procedure time.
- › More than 1,000 prototypes led to a process called **smart-linking**, a cross-linking technique that enhances vital function and mechanical properties without compromising biocompatibility.<sup>1</sup>
- › This versatile breakthrough delivers treatment flexibility with unlimited product supply, absolute consistency, and no special storage requirements or preparation prior to use.

The innovative benefits of Geistlich Fibro-Gide® make it the ideal alternative to connective tissue grafts for increasing soft-tissue thickness around implants and natural teeth.

## Documented

More than 1,000 publications

## Reliable

More than 30 years of  
clinical experience

## Experienced

More than 165 years of  
Geistlich collagen competence

**CAUTION:** Federal law restricts these devices to sale by or on the order of a dentist or physician.

### Indications:

Geistlich Fibro-Gide® is indicated for soft-tissue augmentation:

- › Localized gingival augmentation to increase keratinized tissue (KT) around teeth and implants
- › Alveolar ridge reconstruction for prosthetic treatment
- › Recession defect for root coverage

### Warnings:

As Geistlich Fibro-Gide® is a collagen product, allergic reactions may not be totally excluded. Possible complications which may occur with any surgery include swelling at the surgical site, flap sloughing, bleeding, dehiscence, hematoma, increased sensitivity and pain, redness and local inflammation.
